

CLIMATE LEADERSHIP: HOW CITIES WILL GET THE JOB DONE

BRENDAN SHANE and ERIC AST

www.c40.org

THIS IS C40

92 of the world's leading megacities working together to tackle climate change

11%
of global population

25%
of global GDP

**Bloomberg
Philanthropies**

CIFF CHILDREN'S
INVESTMENT FUND
FOUNDATION

Realdania

“As mayors, we all face similar challenges and have to innovate to solve them, often in the same ways.

The C40 network connects us all, enabling us to share ideas and collaborate, working together towards a greener, healthier future.”

Mayor of Paris and C40 Chair, Anne Hidalgo

The power of networks is in building on individual strength of members and then driving collective action

Relationships are critical at all levels – mayors and staff

25% of city action tied directly to knowledge sharing

Promoting Ambitious Climate Action in Cities

Goal 1 Engage mayoral leadership

Goal 2 Support cities to prepare robust inventories and ambitious targets and plans

Goal 3 Accelerate action through peer-to-peer exchange, direct support, and strategic partnerships

Goal 4 Remove barriers to city climate action (technical, organizational, political, and financial)

Goal 5 For non-C40 cities, provide thought leadership, agenda-setting communications, and world class events to inspire and transfer knowledge

**C40 BUSINESS PLAN:
MOVING THE PARIS
AGREEMENT FROM
ASPIRATION TO ACTION**

CONNECTIVITY – ALIGNMENT – COLLECTIVE IMPACT

Targeted initiatives across key elements of a low-carbon and climate-resilient city

NETWORKS & INITIATIVES

ADAPTATION & WATER

- Climate Risk Assessment
- Connecting Delta Cities
- Cool Cities

TRANSPORTATION

- Bus Rapid Transit
- Low Emission Vehicles
- Walking and Cycling
- Mobility Management

SOLID WASTE

- Sustainable Solid Waste Systems
- Waste to Resources

URBAN PLANNING & DEVELOPMENT

- Land Use Planning
- Low-Carbon Districts
- Food Systems

ENERGY

- Private Building Efficiency
- Municipal Building Efficiency
- Clean Energy

FINANCE & ECONOMIC DEVELOPMENT

- Green Growth
- Sustainable Infrastructure
- Finance

Adaptation & Water

Transportation

Solid Waste

Urban Planning & Development

Energy

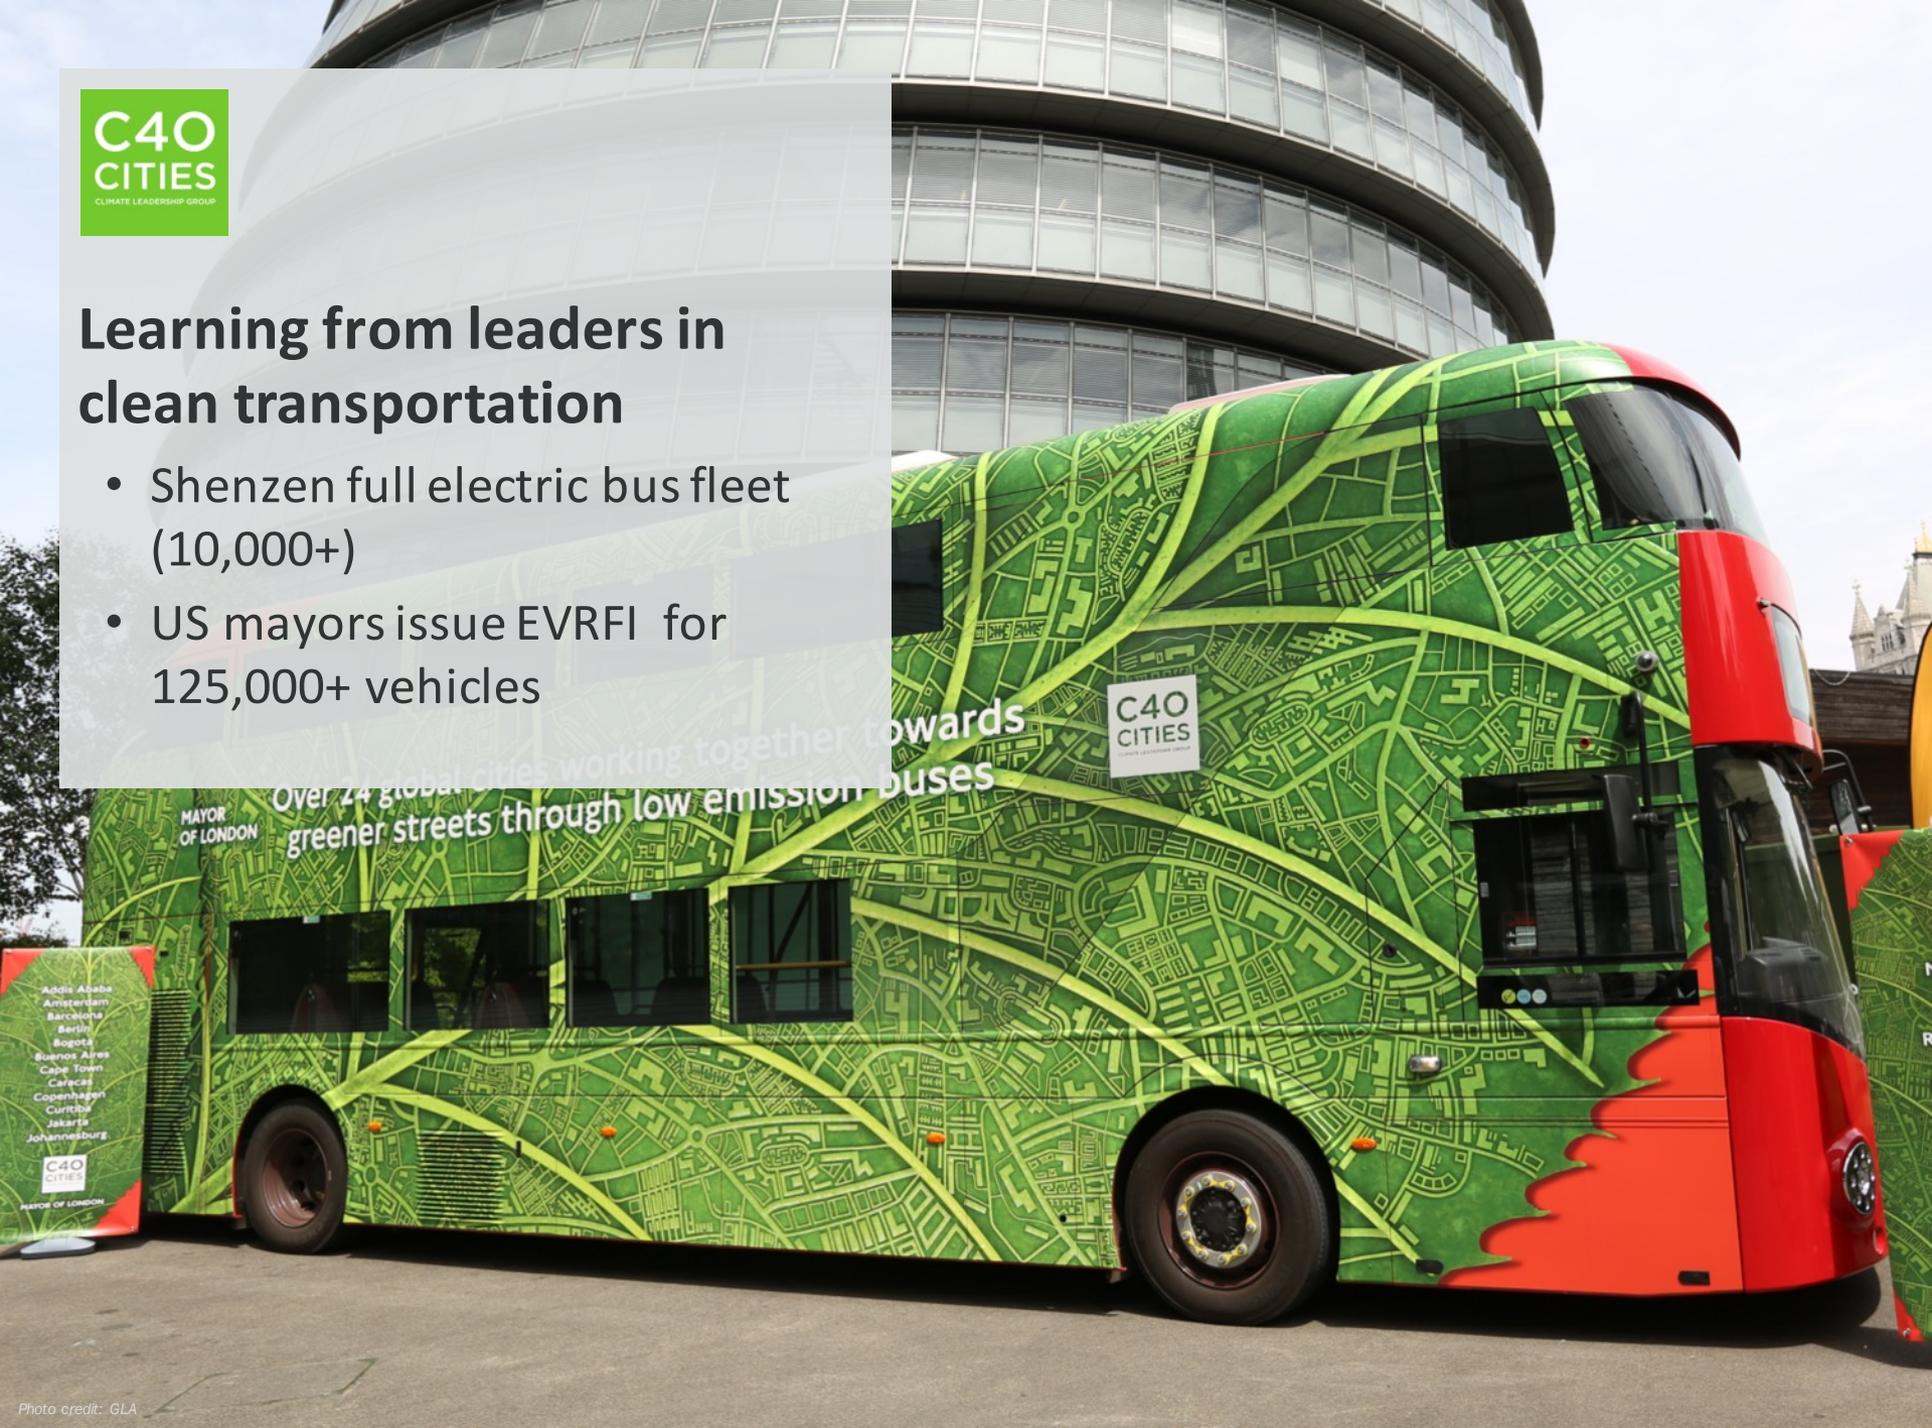

Finance & Economic Development

Planning, Measurement & Reporting

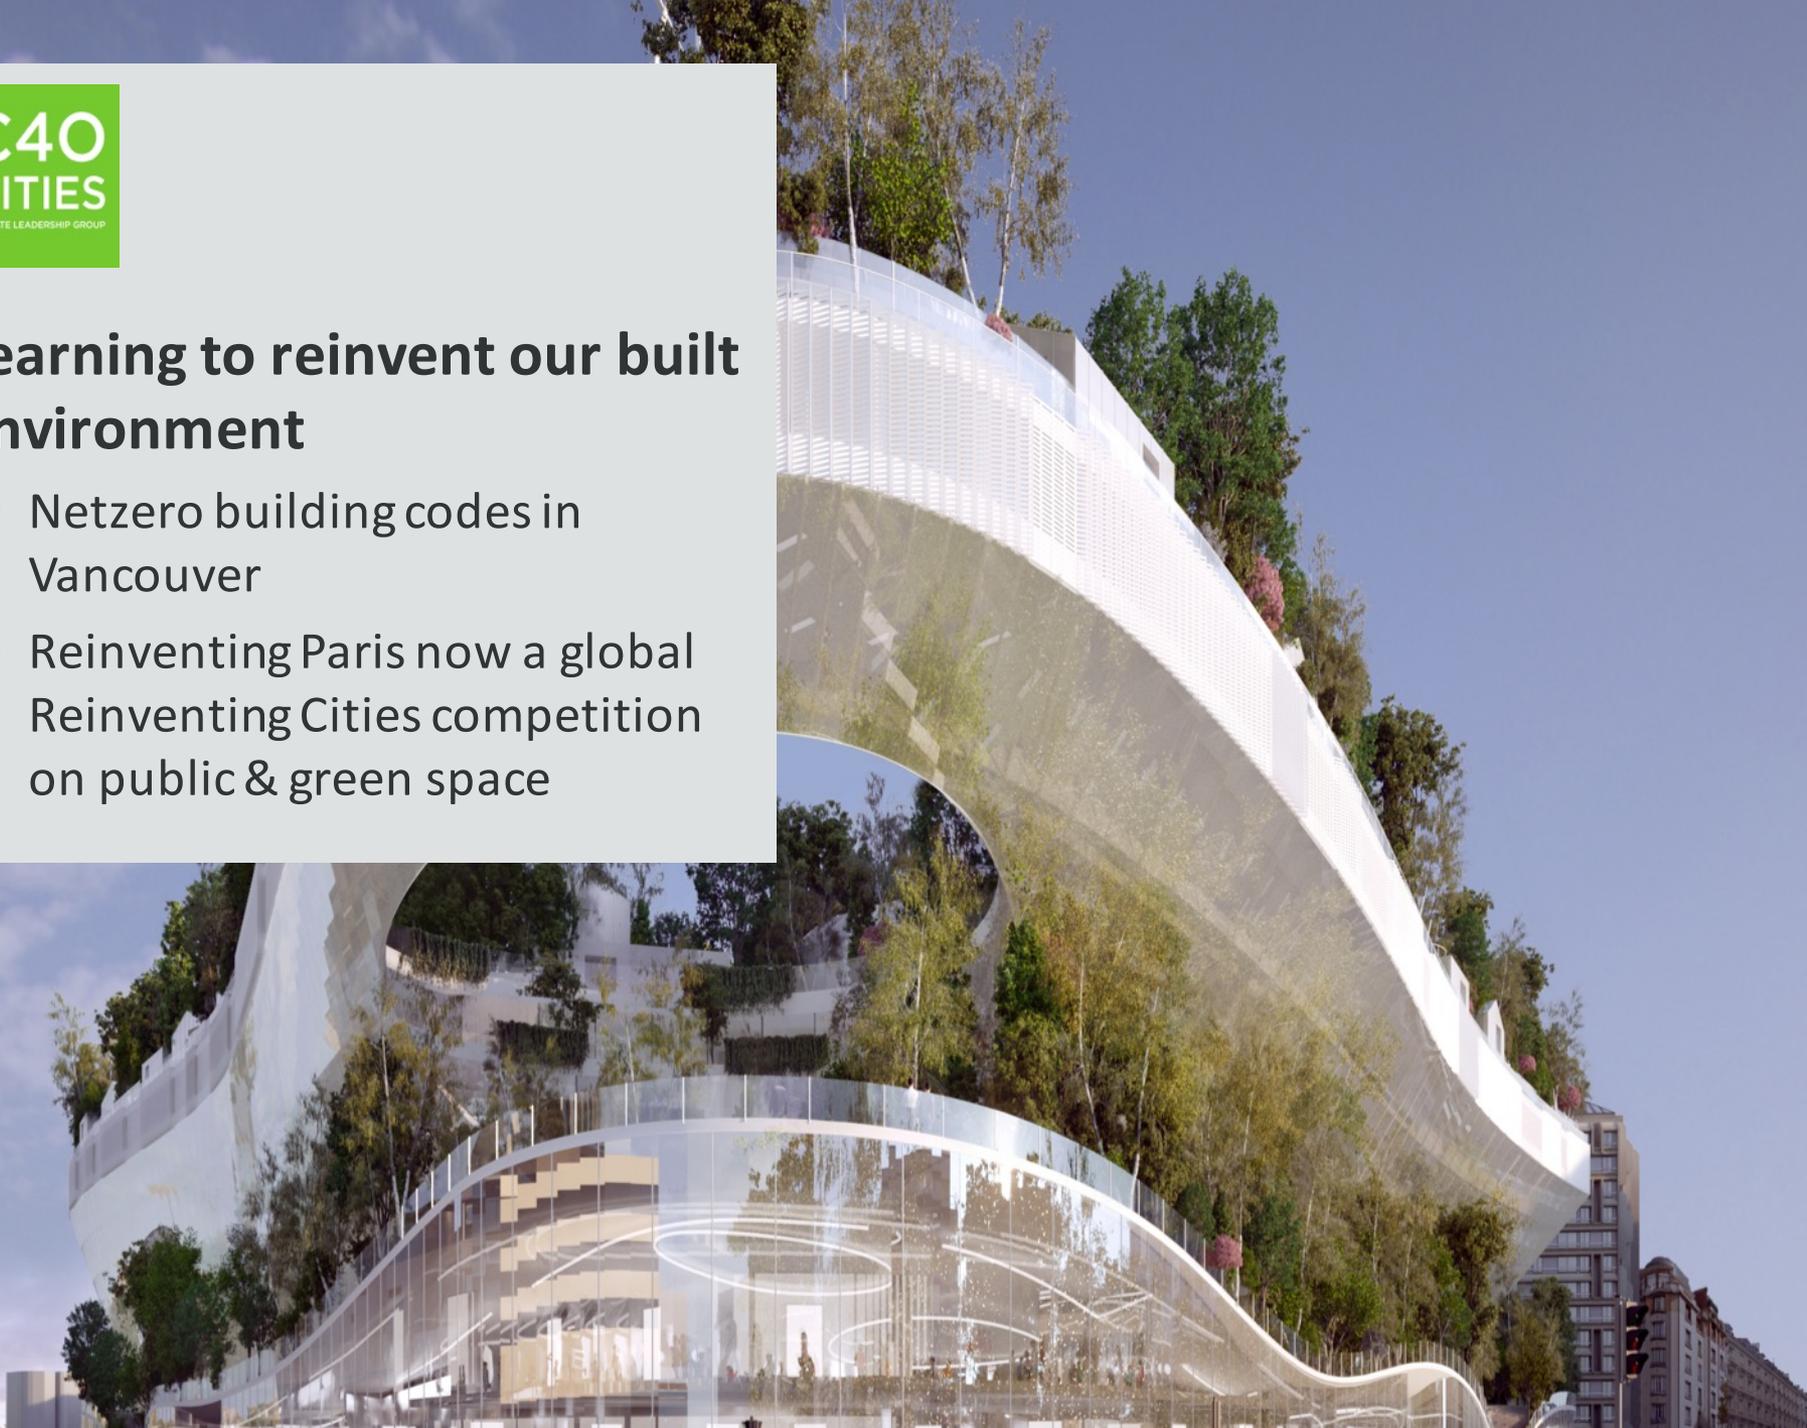

Learning from leaders in clean transportation

- Shenzhen full electric bus fleet (10,000+)
- US mayors issue EVRFI for 125,000+ vehicles

Learning to reinvent our built environment

- Netzero building codes in Vancouver
- Reinventing Paris now a global Reinventing Cities competition on public & green space

Learning to cool our cities

- NYC cool city program includes coating 2 million sf of cool roofs, reducing 830 tonnes CO₂e
- Heat Island and health studies in DC, Tokyo, Toronto

**C40 BUSINESS PLAN:
MOVING THE PARIS
AGREEMENT FROM
ASPIRATION TO ACTION**

CONNECTIVITY – ALIGNMENT – COLLECTIVE IMPACT

A high-angle, wide shot of the Paris skyline, featuring the Eiffel Tower prominently in the center. The city's dense architecture and rooftops are visible in the foreground and middle ground. The sky is a mix of grey and orange, suggesting a sunset or sunrise. The overall tone is dramatic and urgent.

C40 cities delivering the Paris Agreement

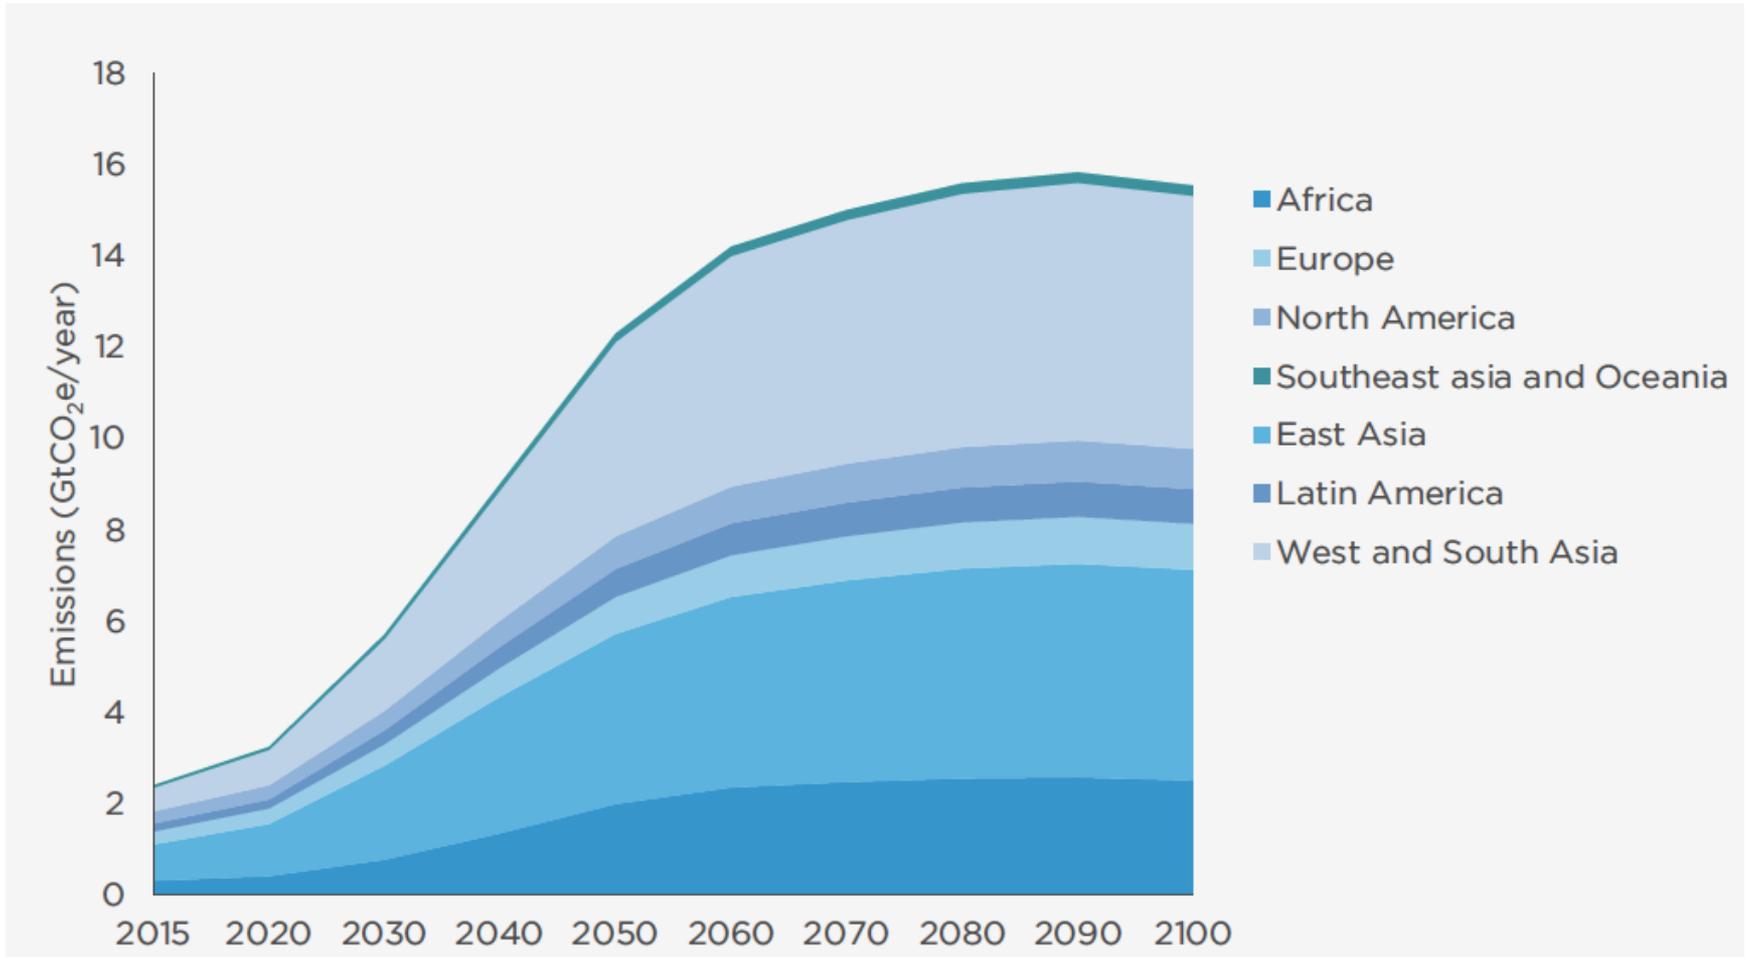

DEADLINE 2020 PROGRAMME

**If we do not take sufficient action now, it will be
IMPOSSIBLE to deliver the ambition of the Paris
Agreement to limit global warming to 1.5°C**

**C40
CITIES**

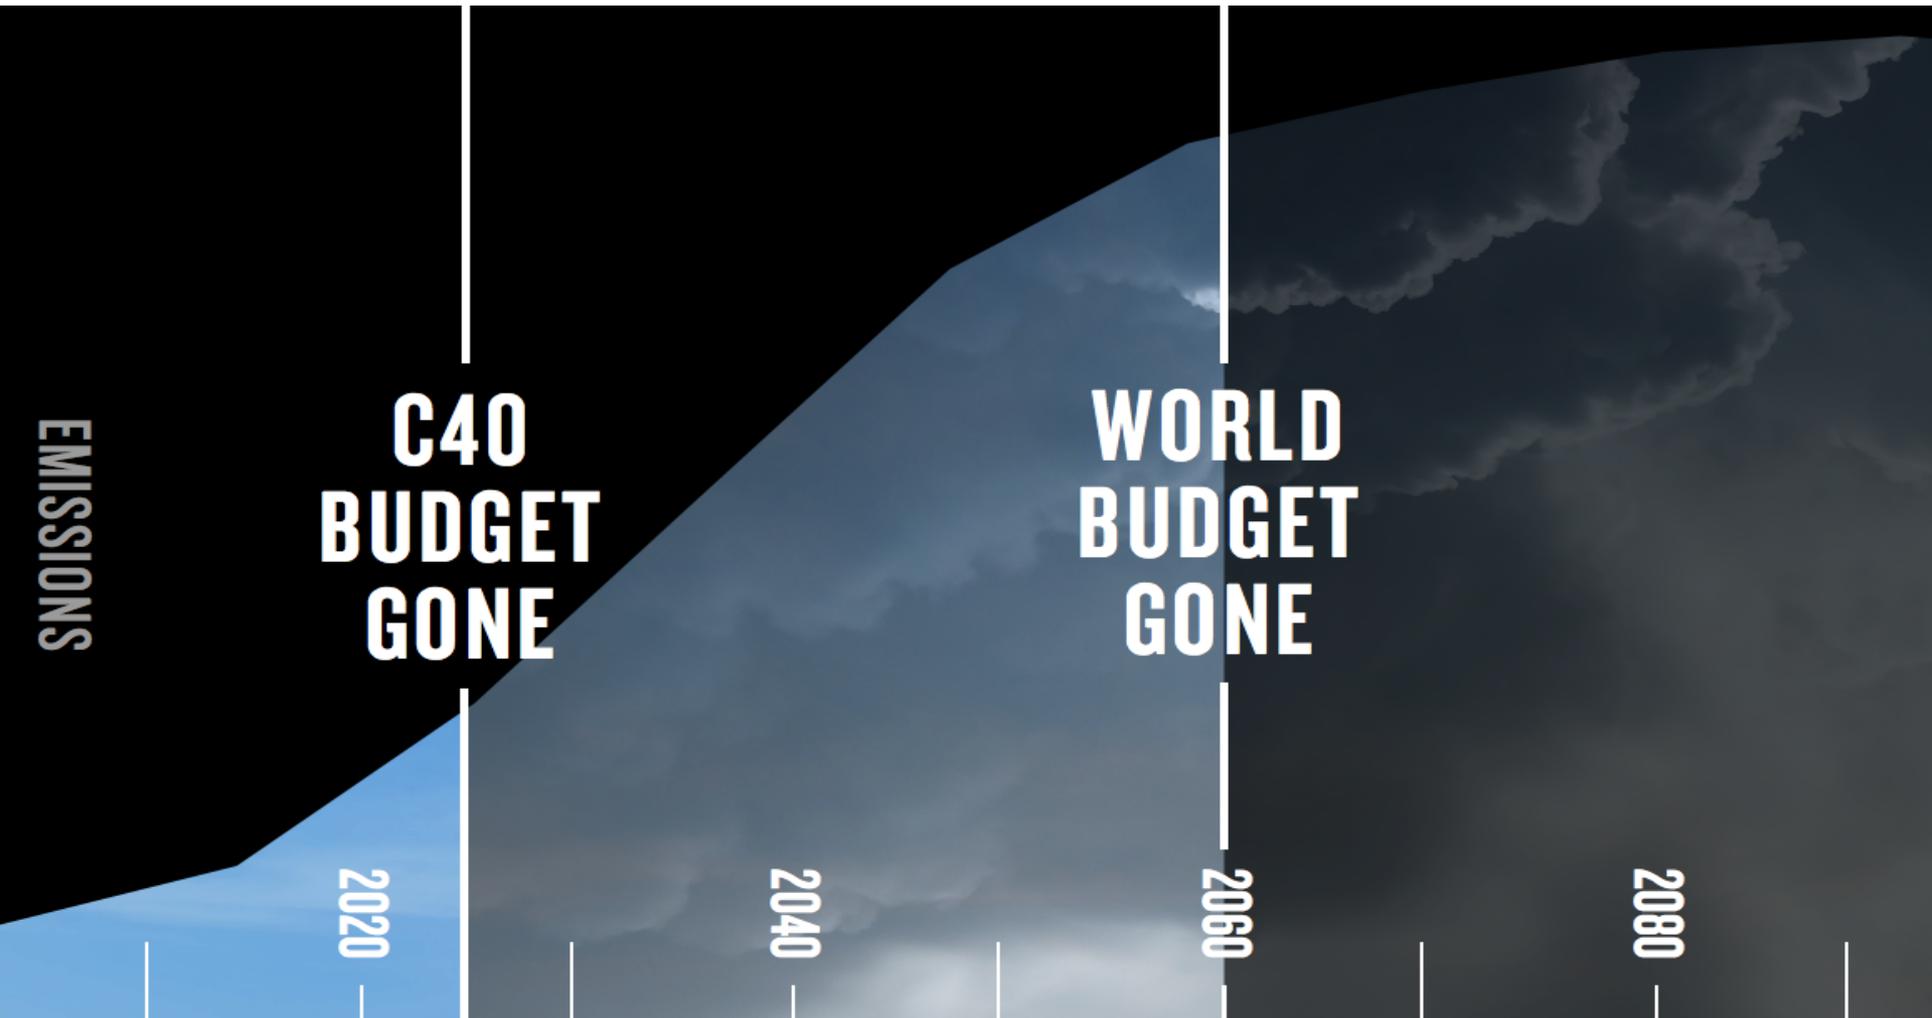

DEADLINE 2020

The scope of the challenge

DEADLINE 2020

Business as usual consumes the carbon budget in 10 years

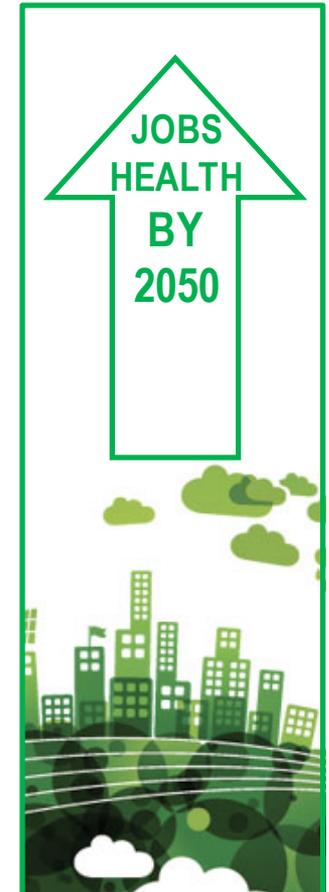

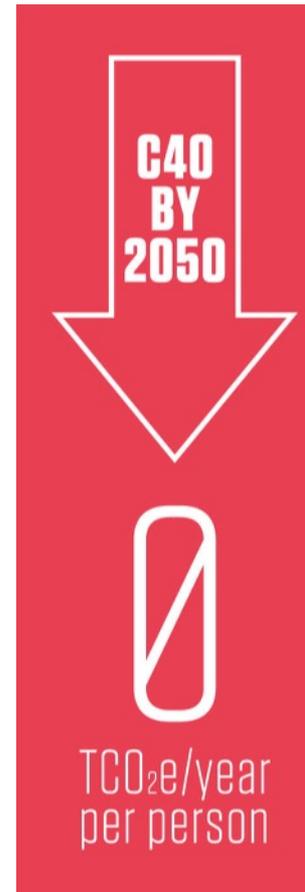

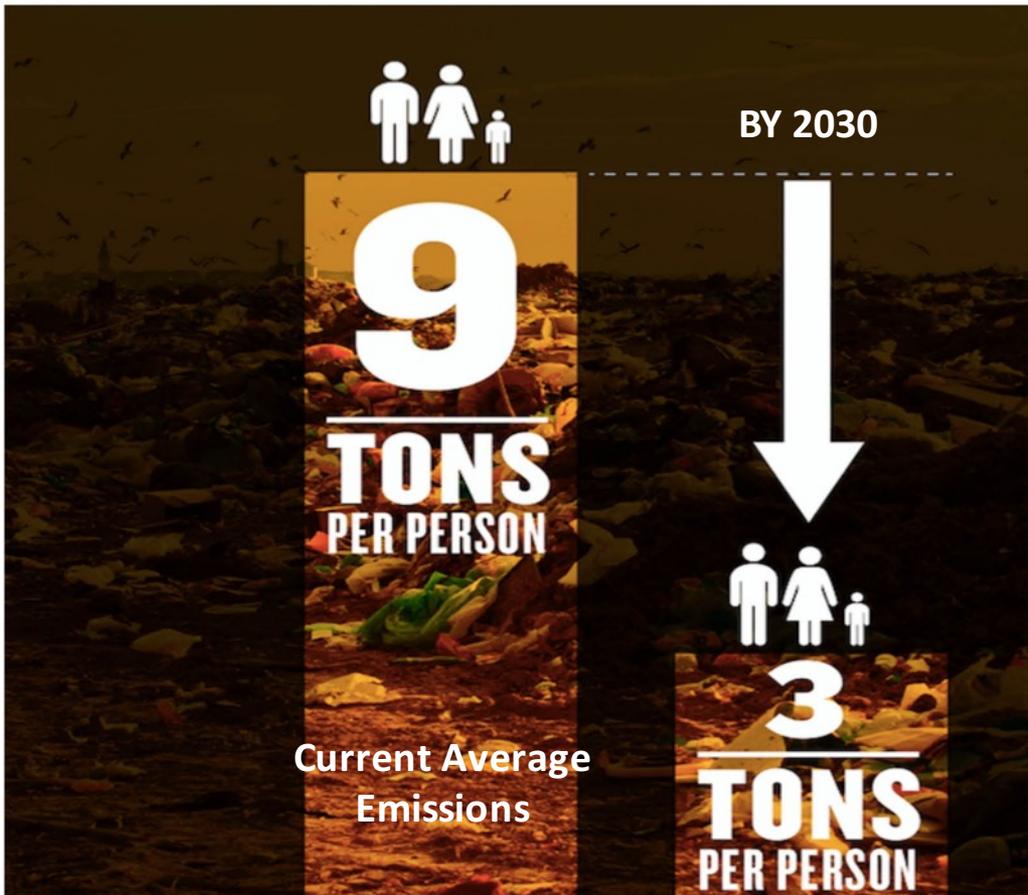

We have a roadmap for responding to climate change

- At **COP21** in 2015, nations achieved the **Paris Agreement** aiming to limit global temperature increases to 1.5°C and promoting climate resilience
- Afterwards C40 asked: “**what would it take for C40 cities to collectively, and individually, deliver the Paris Agreement?**” in terms of both mitigation and adaptation
- At the C40 Mayors Summit in December 2016, we launched the response: **Deadline 2020**
- Deadline 2020 is the result of a year long research project between C40 and the consultancy Arup
- It is **the world’s first road map** that shows how cities can achieve the Paris Agreement
- This **ongoing** work will help guide cities in avoiding the worst of climate change

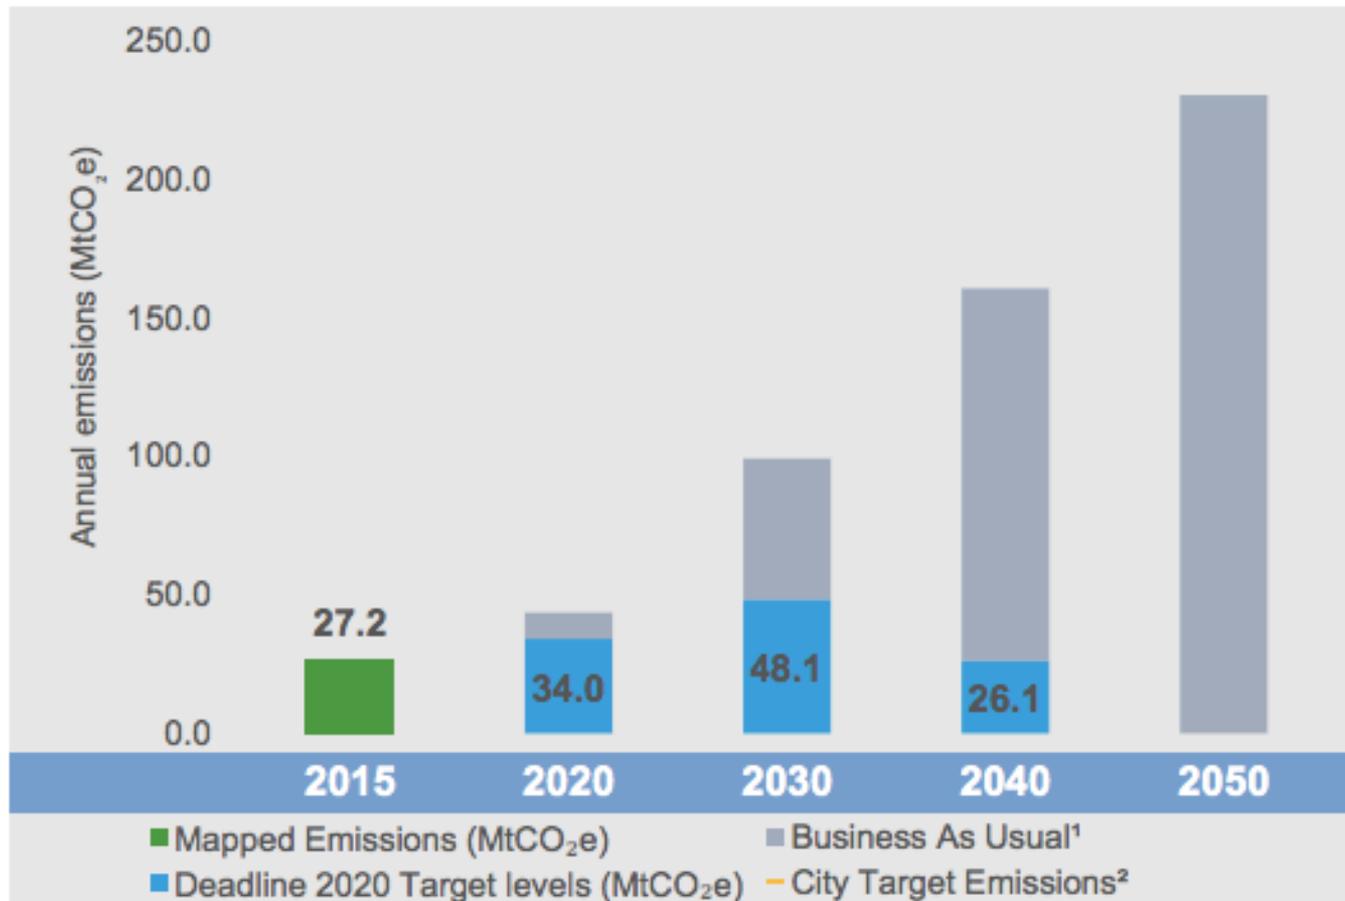

DEADLINE 2020

From 2020, new ambition and innovation to reduce emissions and increase benefits

What the 1.5°C trajectory looks like

Figure E1. City annual emissions to 2050

**C40 BUSINESS PLAN:
MOVING THE PARIS
AGREEMENT FROM
ASPIRATION TO ACTION**

CONNECTIVITY – ALIGNMENT – COLLECTIVE IMPACT

**ONLY DECISIVE CLIMATE ACTION WILL DELIVER NEEDED
REDUCTIONS IN EMISSIONS & RISK**

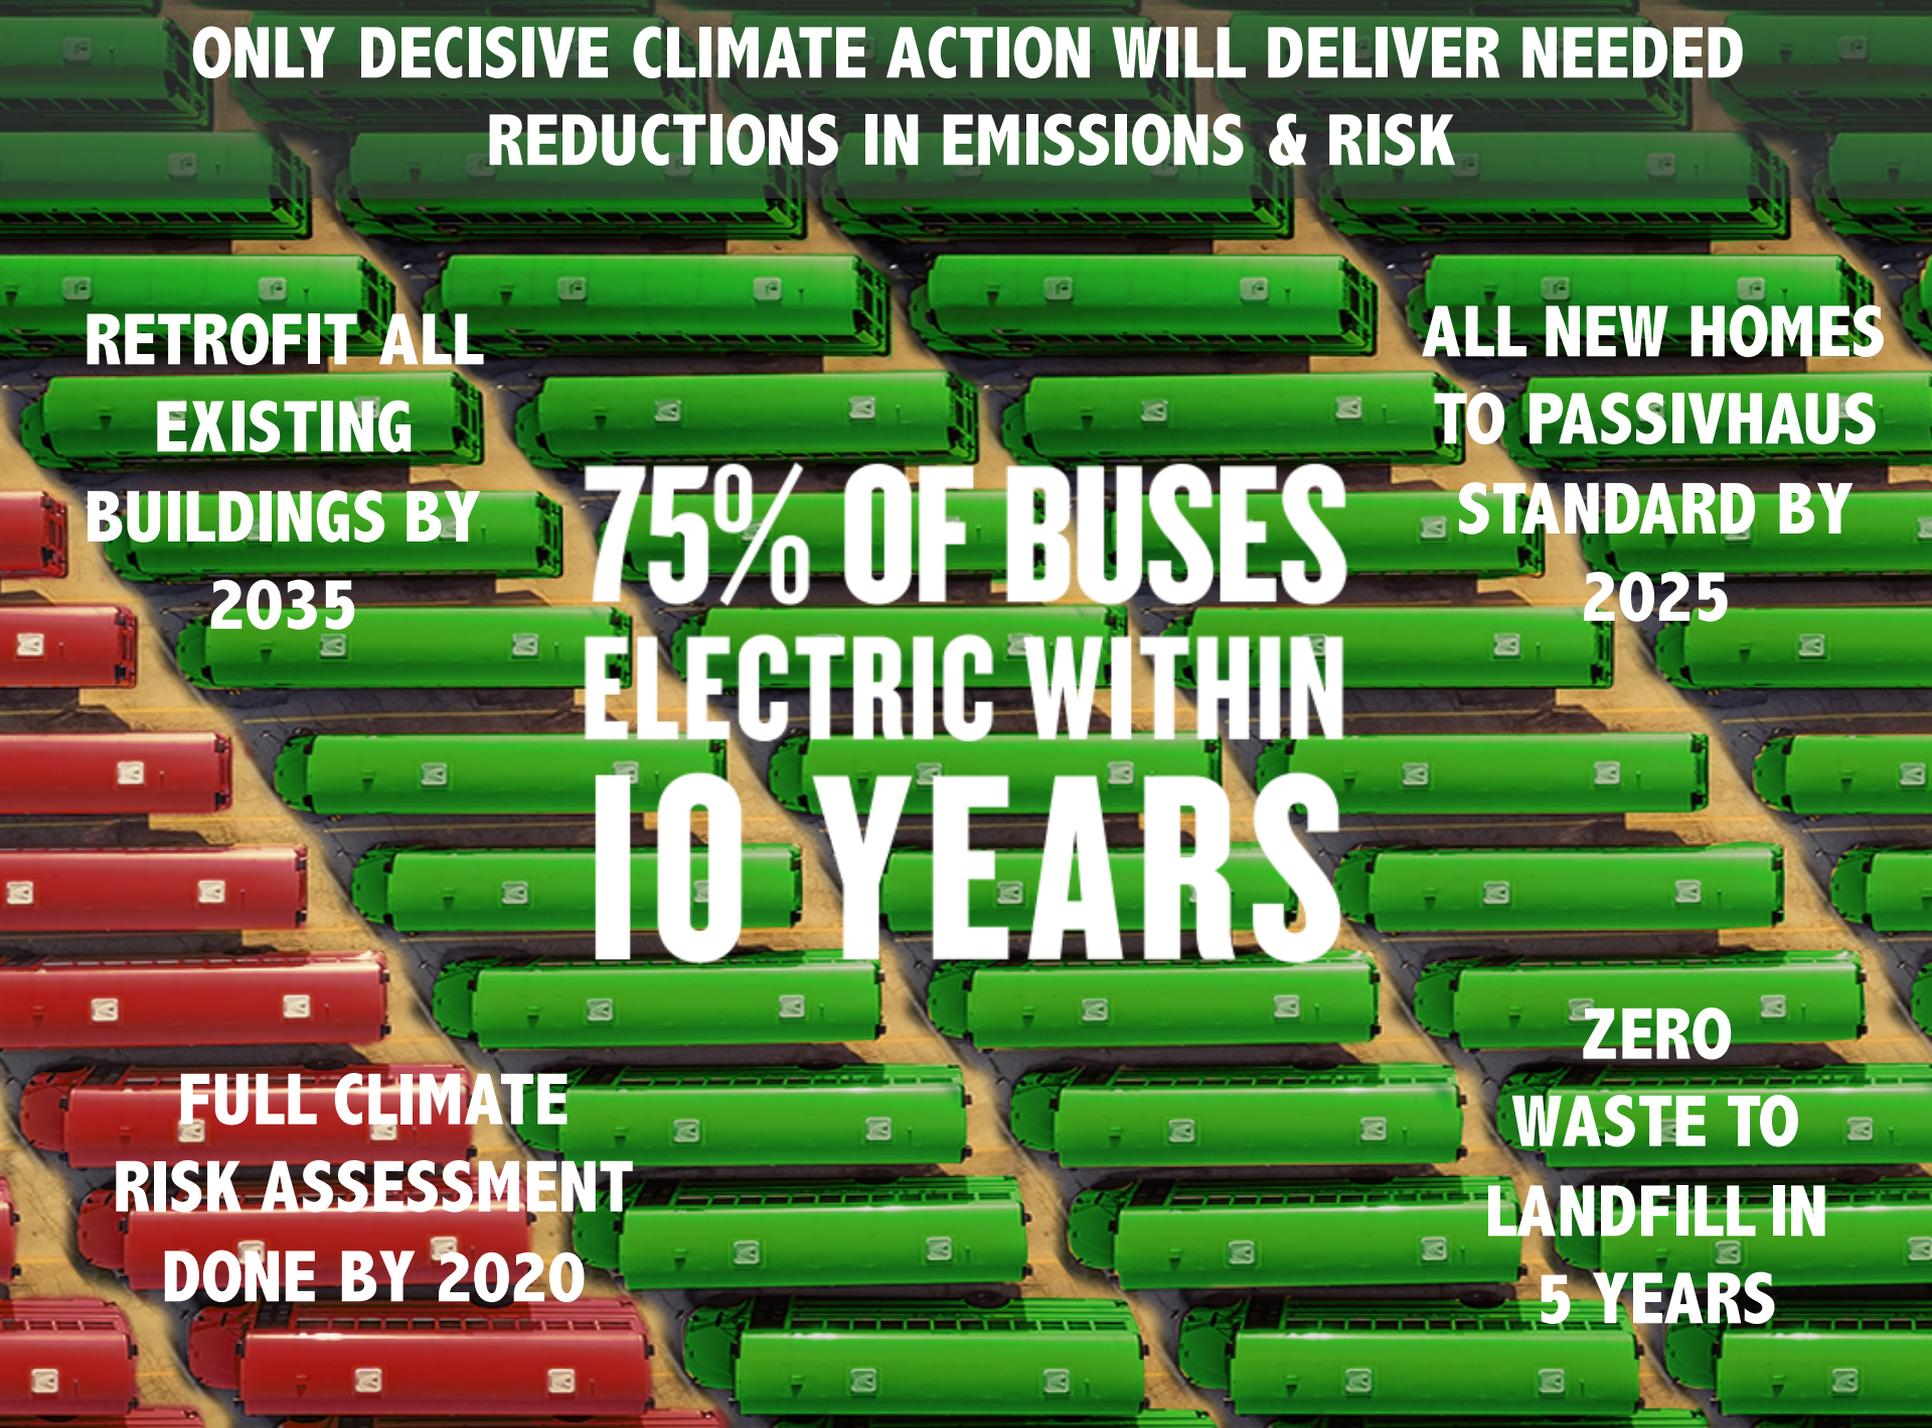

**RETROFIT ALL
EXISTING
BUILDINGS BY
2035**

**ALL NEW HOMES
TO PASSIVHAUS
STANDARD BY
2025**

**75% OF BUSES
ELECTRIC WITHIN
10 YEARS**

**FULL CLIMATE
RISK ASSESSMENT
DONE BY 2020**

**ZERO
WASTE TO
LANDFILL IN
5 YEARS**

DEADLINE 2020

Ensuring Inclusive Climate Action

- 
- Delivering tools and peer-to-peer support to promote equity in action
 - Making the case for climate action
 - *Understanding climate benefits -> more climate action*
 - Ensuring benefits are inclusive and accessible
 - *Inclusion -> scaling climate action citywide to maximize impact*

DEADLINE 2020

Mayors can lead a global transformation

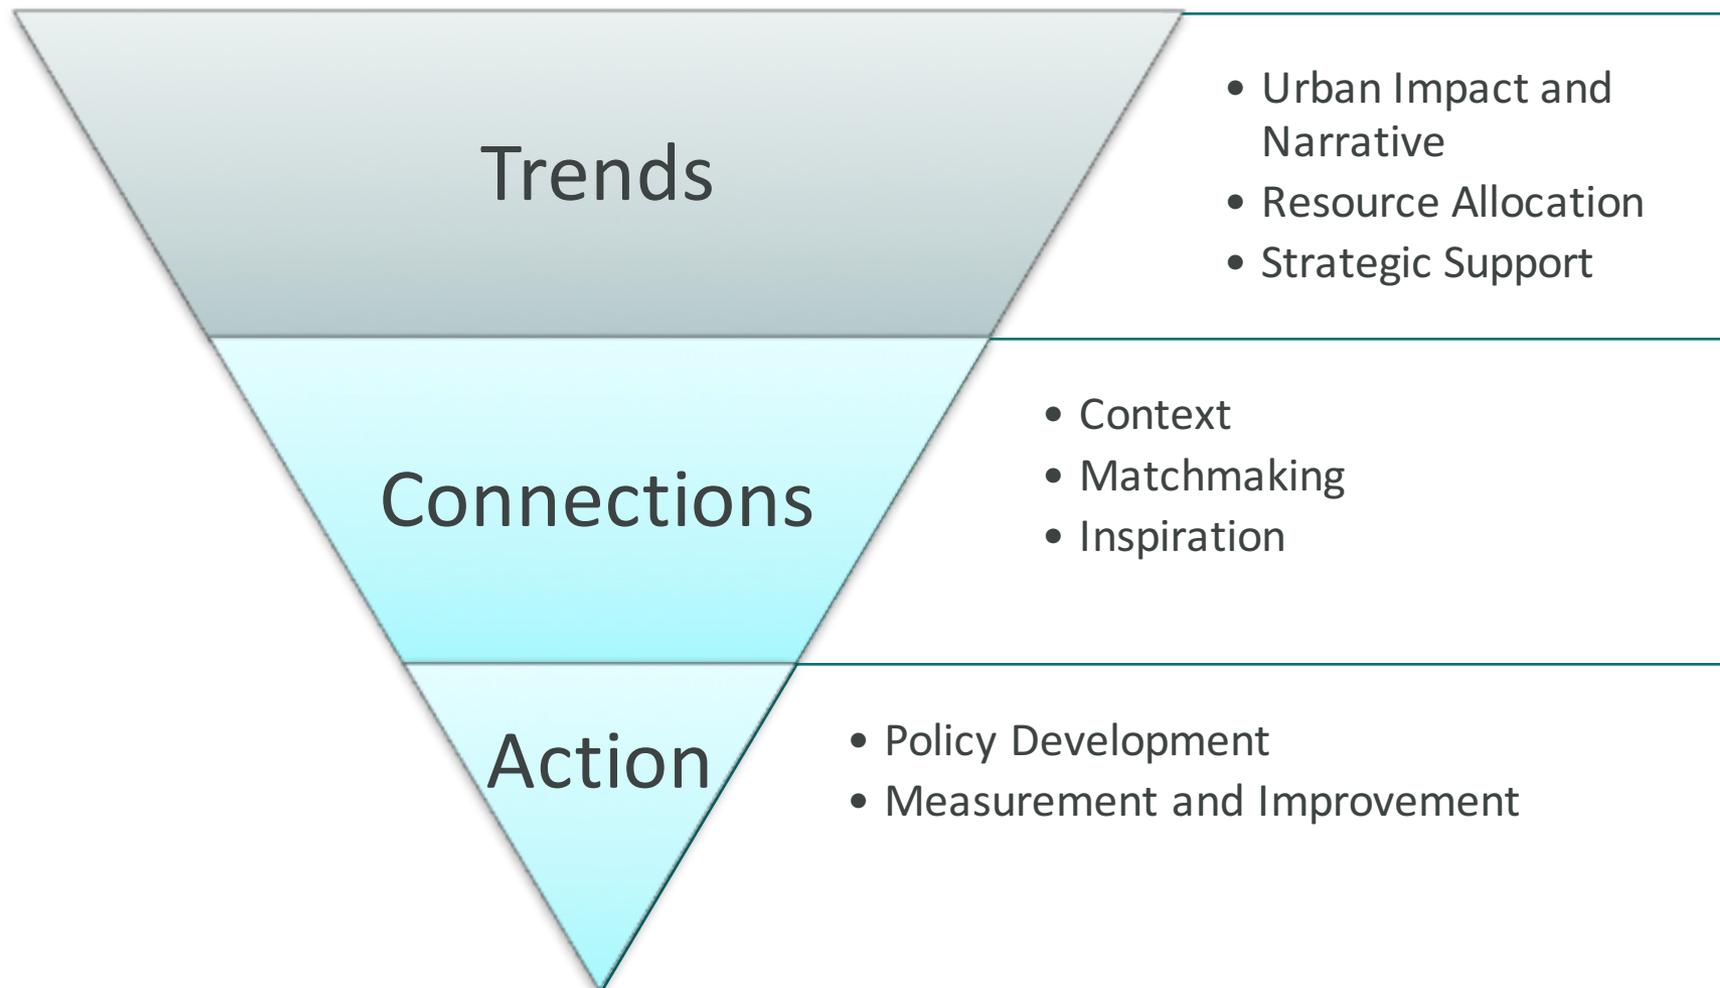

HOW C40 WORKS WITH DATA

In the beginning there was
nothing, which exploded.

Terry Pratchett

C40's approach is framed by 3 general objectives

C40 has a number of approaches to data-driven problem solving

C40 research includes frameworks and data on climate action, mayoral powers, and action benefits

**40
Cities**

**4,734
Actions**

C40 research includes frameworks and data on climate action, mayoral powers, and action benefits

**59
Cities**

**8,068
Actions**

C40 research includes frameworks and data on climate action, mayoral powers, and action benefits

**66
Cities**

**9,831
Actions**

C40 research includes frameworks and data on climate action, mayoral powers, and action benefits

C40 research includes frameworks and data on climate action, mayoral powers, and action benefits

Standards improve the comparability, and accountability of data

Global Protocol for Community-Scale Greenhouse Gas Emission Inventories (GPC)

GPC, the world's most widely-endorsed GHG accounting and reporting standard for cities, enables local leaders to build more effective climate strategies and track the performance of actions already underway.

WITHOUT GPC

WITH GPC

Different types of measurements

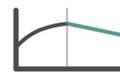

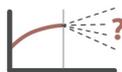

One measurement

Account for only a portion of emissions

Consistently account for all emissions

Unclear if climate targets will be met

Emissions trajectory well understood

Incomplete data limits investment

Good data drives investment

Unable to relate to national climate action

Can measure city's contribution to national climate efforts

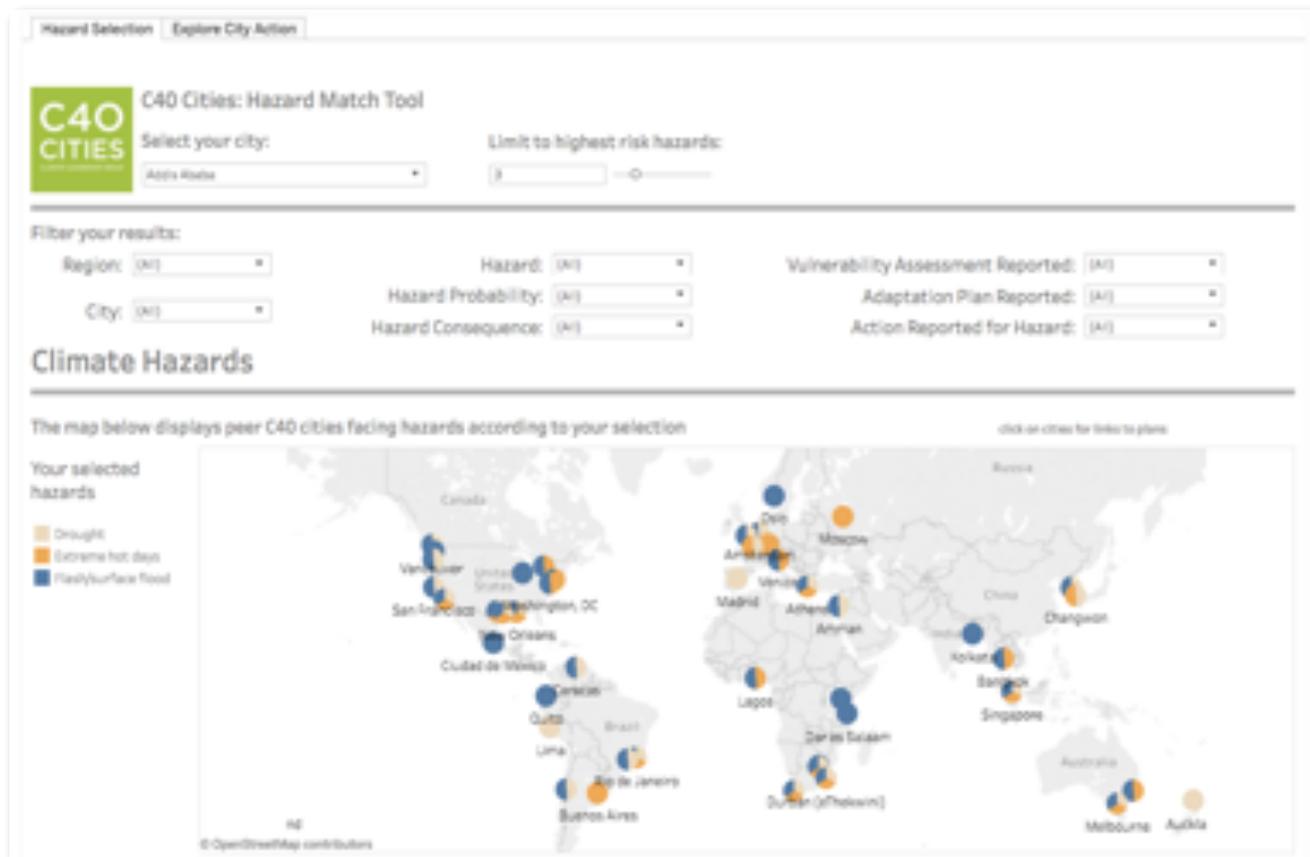

| HAZARD GROUP | HAZARD (GPP/THG) | CITY CLIMATE HAZARD (THG) | CITY CLIMATE HAZARD (GPP/THG) |
|---------------------|-----------------------------|--|---|
| Meteorological | Precipitation | Rain storm | Monsoon |
| | | Heavy snow | Snowstorm/blizzard |
| | Wind | Severe wind | Dust storm/sandstorm |
| | | Tornado | Extratropical cyclone |
| | | Cyclone (Hurricane/Typhoon) | |
| | Lightning | Electrical storm | Lightning/thunderstorm, derecho |
| | | Fog | |
| | Extreme temperature - Cold | Extreme winter conditions | Ice, hail, freezing rain, debris avalanche |
| | | Cold wave | Cold snap, frost |
| | Extreme temperature - Hot | Extreme cold weather | Cold days |
| Heat wave | | Hot days | |
| Climatological | Water scarcity | Drought | Lack of precipitation and seasonal melt (snow, glacier) |
| | Wild fire | Forest fire | |
| | | Land fire | Bush fire, grass fire, pasture fire, scrub fire |
| Hydrological | Flood | Flash/surface flood | Glacial lake outburst |
| | | River flood | |
| | | Oceanic flood | |
| | Wave action | Groundwater flood | Waterlogging |
| | | Storm surge | Seiche |
| | Chemical change | Salt water intrusion | |
| Ocean acidification | | | |
| Geophysical | Landslide | Landslide | Lahar, mud flow, debris flow |
| | | Avalanche | Debris avalanche, snow avalanche |
| | Rockfall | | |
| | Subsidence | | Sudden subsidence (sinkhole), long-lasting subsidence |
| Biological | Insects and micro-organisms | Water-borne disease | E.g. Cholera, Typhoid, Legionnaires' disease |
| | | Vector-borne disease | E.g. Malaria, Dengue Fever, Yellow Fever, West Nile Virus, Bubonic Plague |
| | Air-borne disease | E.g. Pneumonia, Plague, Influenza | |
| | Insect infestation | E.g. Pine beetles, killer bees, termites | |

Emissions data indicates key emissions sectors

And identifies data quality gaps

This heatmap displays average scores for the activity data and emission factors reported by cities and weighted according to the share of emissions from each activity. The two averages were multiplied to obtain an overall data quality score for each GPC sub-sector differentiated by scope.

Quito uses GIS to map ecosystems, estimate future deforestation rates, and prioritize adaptation measures

60%

Portion of Quito's high-altitude territory covered by vegetation

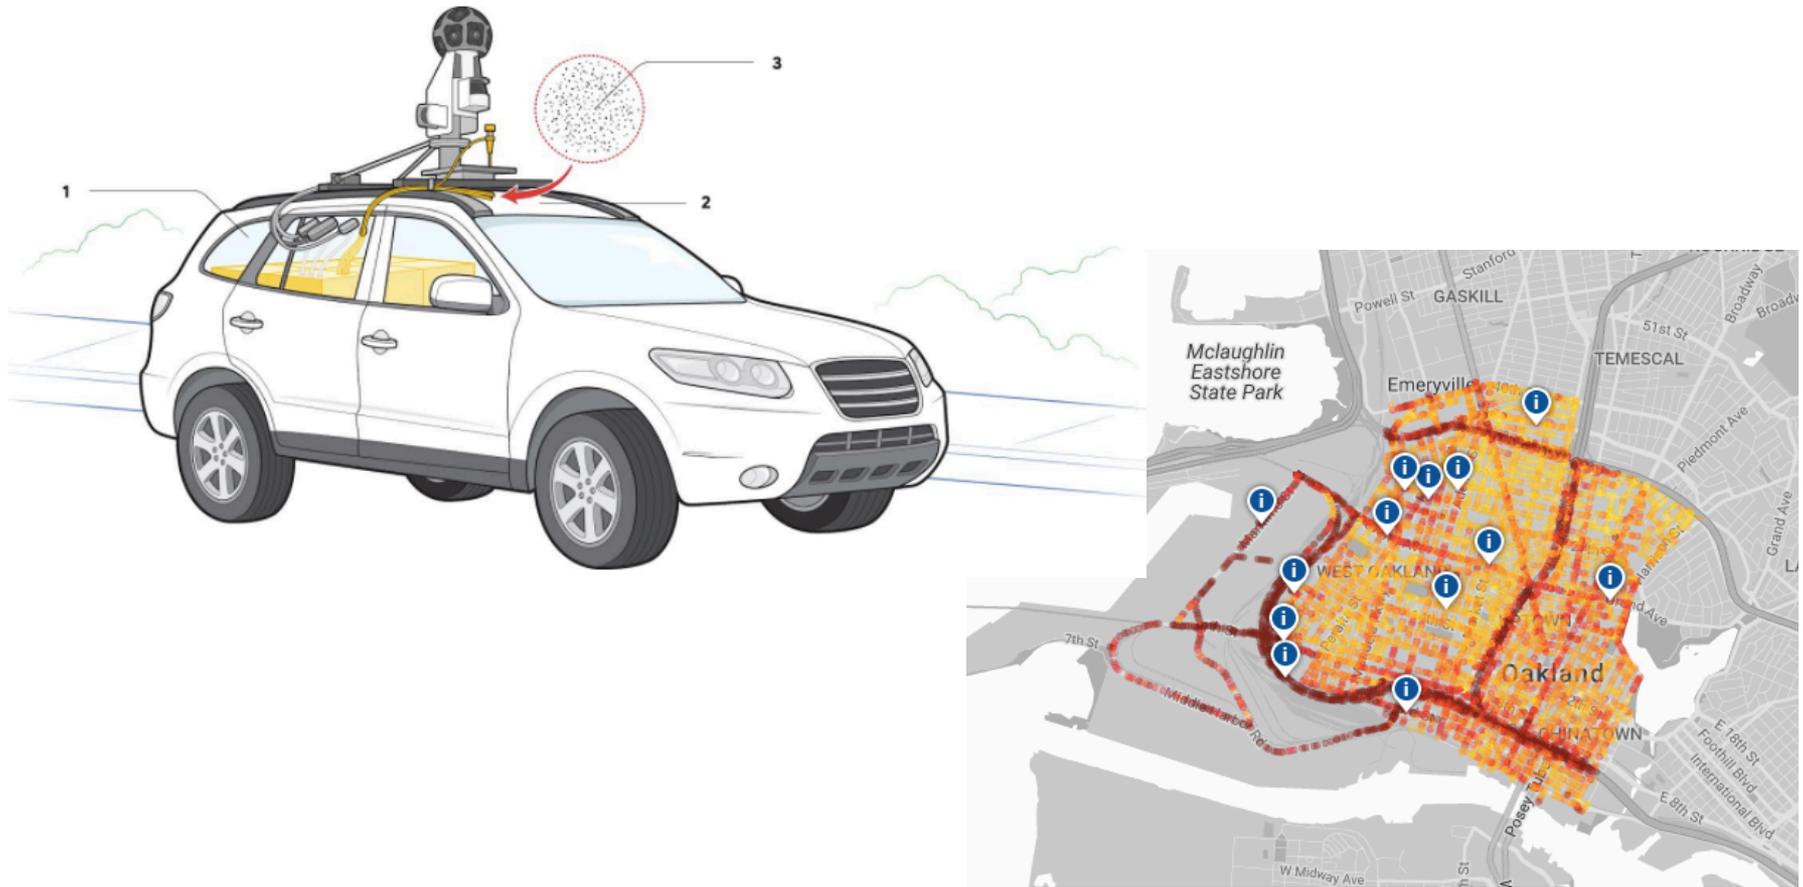

175,000

Hectares protected under a Municipal Protected Areas scheme.

5%

Annual emissions reduction from sequestration

Oakland, California worked with the EDF and Google to assess air quality with mobile sensors
